Animal Crossing x Seattle Aquarium

Seattle Times

Nintendo is expanding its horizons to the Emerald City this fall, partnering with the Seattle Aquarium to bring an immersive Animal Crossing experience to visitors.

The aquarium calls it "the crossover you didn't know you needed." Characters from Animal Crossing: New Horizons, an island-themed Nintendo Switch game, will be popping up throughout the museum. The exhibit will feature photo ops, a smartphone-based scavenger hunt and more.

Aquarium members can get an early look at 9 a.m. on Oct. 7 and 8, before the aquarium opens to all guests at 9:30 a.m. The partnership runs through Dec. 31. Additional Animal Crossing-themed activities and events will be announced throughout this limited-time run.

A game I didn't know I needed this year

I graduated from college and started my first real job this year, and it would be a total lie to say the transition was anything less than disorienting for me. I was not only leaving the familiarity of the academic environment I'd been in for 18 years, but I was also reacting to the over-stimulus adult freedom that I had been working toward my whole life.

That newfound freedom wasn't all I'd imagined it was. I went from long evenings filled with studying and nights out with my friends to boredom. Once I got home from work, I had nothing to do. I wasn't used to having this much time for myself. No homework to be done, no exams to study for, just free time. Since I was making enough money to finance what (for me) was a huge purchase, and I had my own room, I felt like I had a lot of freedom to do as I pleased.

From scorching instrumentals and friendly banquets to the incomparable joy that comes from watching a rare bird or fish, Animal Crossing and its whimsical charm have won me over.

The first night I had the game, I played for about four hours. If you're a regular gamer, that might not seem too intense. And I don't usually play video games in my free time. Getting me to sit down and engage with a game for that long was an absolute feat and a testament to the power of Animal Crossing.

It was a part of my nighttime routine to play Animal Crossing for about an hour before I go to sleep. If you're like me, and you're looking for a fun break to give yourself to kick boredom, or if you're just looking for a wholesome game to add to your rotation, Animal Crossing: New Horizons has my vote.

Fall is here!

On October 31st, from 5pm to midnight, the big Halloween event really happens. Villagers will dress up in costumes and will wander around outside. They will approach the player, asking for Candy (you have to eat the candy before the event). Hopefully you've stocked up on Candy so you've got plenty to give out. Giving a villager Candy gets you an item from the Spooky Series, so it's a great way to get items from the series you've been given out. You'll get pumpkin instead. If you give out Candy more than once to a particular villager, you'll even have to make a Lullaby instead of an item. After you get a Lullaby through, you can start getting items again. If you give a Lullaby to a villager, you'll get the Spooky Candy Set.

A game I didn't know I needed this year

I graduated from college and started my first real job about a year ago, and it would be a total lie to say that I wasn't only leaving the familiarity of the classroom environment I'd been in for 18 years, but I was also reacting to the over-caffeinated adult world that I had been working toward my whole life.

That first night I didn't sleep. I'd imagined it would be a week from busy evenings filled with studying and nights out with the friends I'd known. Once I got home from work, I had nothing to do. I wasn't used to having this much time for myself. No homework to be done, no stress to ease for just five more days. I was making enough money to finance what (for me) was a huge purchase, and I had my own room to live in. I realized on a level I'd wanted for months, the freedom, the choice, and the ability to live the life I wanted. Animal Crossing: New Horizons.
